DETAILED ACTION

Claims 12-14, 16, 19-23, 26-27 and 30-31 are currently pending in the instant application.

The amendment filed on 8/13/2007 amending claims 12, 16, 19-20, 26-27 and 30-31 is acknowledged. Claims 1-11, 15, 17-1824-25 and 28-29 remain cancelled.

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/29/2007 has been entered.

Claims 12-14, 16, 19-23, 26-27 and 30-31 are under consideration.

Rejections and/or objections not reiterated from previous office actions are hereby withdrawn.

Election/Restrictions

The amendment to claims with new limitations (SEQ ID NOs) raise new issues, i.e. claims 12, 16, 19, 20, 23, 27 and 31 comprise patentably distinct polypeptide sequences. A new Restriction requirement is deemed necessary for expedite the prosecution.

Therefore, Restriction to one of the following inventions is also required under 35 U.S.C. 121. Therefore, Election is required one of inventions (A) - (E).

(A). protein of SEQ ID NO: 19 or a nucleic acid encoding SEQ ID NO: 19.

Application/Control Number:

10/622,011

Art Unit: 1652

(B). protein of SEQ ID NO: 20 or a nucleic acid encoding SEQ ID NO: 20.

(C). protein of SEQ ID NO: 21 or a nucleic acid encoding SEQ ID NO: 21.

(D). protein of SEQ ID NO: 28 or a nucleic acid encoding SEQ ID NO: 28.

(E). protein of SEQ ID NO: 29 or a nucleic acid encoding SEQ ID NO: 29.

The inventions are distinct, each from the other because of the following reasons:

Page 3

1. The proteins of Group (A)-(E) used in the claimed method are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions represent structurally different polypeptides and polynucleotide encoding them. Therefore, where structural identity is required, such as for hybridization or expression or antibody binding, the different sequences have different effects.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;

Application/Control Number:

10/622,011

Art Unit: 1652

Page 4

(c) the inventions require a different field of search (for example, searching different

classes/subclasses or electronic resources, or employing different search queries);

(d) the prior art applicable to one invention would not likely be applicable to another

invention;

(e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101

and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include

(i) an election of a invention to be examined even though the requirement may be traversed (37)

CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to

petition, the election must be made with traverse. If the reply does not distinctly and specifically

point out supposed errors in the restriction requirement, the election shall be treated as an

election without traverse. Traversal must be presented at the time of election in order to be

considered timely. Failure to timely traverse the requirement will result in the loss of right to

petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate

which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are

readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct,

applicant should submit evidence or identify such evidence now of record showing the

inventions to be obvious variants or clearly admit on the record that this is the case. In either

instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence

or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37CFR 1.48b if one or more of the currently named inventors are no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Iqbal Chowdhury whose telephone number is 571-272-8137. The examiner can normally be reached on 8:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapu Achutamurthy can be reached on 703-272-0928. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
